

Analyzing energy issues? A must-have book for you !

“EDMC '09 Handbook of Energy & Economic Statistics in Japan” is a compilation of mainly Japanese statistical data on energy and also contains data of different countries. This compact reference resource provides the most useful information to forecast energy demand, to analyze energy supply-demand structure, to compare energy intensity in one country with that in another, and so on. It is a must book for those who engage in international business, as well as who are involved in energy-related industry. This EDMC Handbook is updated annually.
