

Takamasa Hasama, Ph.D.

Senior Research Engineer, Kajima Technical Research Institute Singapore

Dr. Hasama is a senior research engineer at Kajima Technical Research Institute Singapore. His research background is in the built environment, particularly in computational fluid dynamics using high-performance computing, wind engineering, aerosol transmission prevention, urban microclimate, indoor and outdoor thermal comfort studies, and air pollutant dispersion. Currently, he and his research team are focusing on research topics related to wellness and energy savings through novel HVAC control technology.
