

Manuel Palz

He is a policy advisor working in the department *heat, hydrogen and efficiency* of Germany's Federal Ministry for Economic Affairs and Climate Action. Since 2021, he has been working in the unit *General issues of energy and climate action in the buildings sector, strategies and buildings technologies* and is mainly focusing on international activities regarding the building sector, such as the Task Group Energy-Efficiency in the Buildings under the Energy-Efficiency-Hub, as well as the Global Alliance for Buildings and Constructions (GlobalABC).

Before joining the Federal Ministry, he had been working for nearly 10 years in different organisations of the German development cooperation in South and Southeast Asia. In Vietnam, Myanmar, Nepal and the Philippines he had worked as head of project and project lead focusing on mineral resource policies as well as the accelerated expansion of renewable energies.

He obtained a Masters's degree in political science with a focus on Southeast Asian politics from Ruprecht-Karls-University in Heidelberg, Germany and Università degli Studi di Firenze, Italy.
