

Other Information on Energy Efficiency

· The Department of Industry and Science manages a range of information, capacity building and knowledge sharing web resources including the Energy Efficiency Exchange (eex.gov.au), YourEnergySavings.gov.au and YourHome.gov.au websites.

· The Energy Efficiency Exchange (EEX) – supporting energy management and energy efficiency strategies for industry, covering a range of sectors and technologies;

· Your Energy Savings – how to save energy, save money and reduce your impact at home including information on all available government assistance;

· Your Home – providing guidance on building and renovating homes in a sustainable manner.

· The Department manages the COAG website for the Equipment Energy Efficiency Program (energyrating.gov.au) which is in the process of being redeveloped. The Department also developed a mobile app which allows consumers to compare the energy efficiency of labelled appliances using their smartphone.

The department has appointed a Digital Transformation Coordinator and will be publishing its Digital Transition Plan by September 2015. Future directions for Energy Division websites will be included as part of that Plan.
