

1. Title of the measure

Support for high-energy efficiency houses and buildings (project to promote introduction of high-efficiency energy systems into houses and buildings) (FY2015)

2. Purpose of the measure

As one of the measures to promote energy conservation in the household/commercial sector, this measure is intended to encourage the introduction of high-efficiency energy systems for residential and non-residential buildings and to collect and publicize information on the system's energy-efficiency and cost-effectiveness, thereby raising public awareness of energy-efficient residential and non-residential buildings and achieving great strides in energy conservation for buildings.

3. Target sector (transport, building, manufacturing, etc.)

Residential and non-residential buildings

4. Funds and budget for the measure

-

5. Method for measuring the effect of the measure (energy consumption reduction, energy cost reduction, etc.)

6. Result of the measure

7. Future tasks

It is an urgent that steps be taken to promote energy-conservation measures for the household/commercial sector where energy consumption has been making significant increases. Subsidies should be provided to reduce initial costs and boost demand, thereby promoting efforts towards energy conservation in the household/commercial sector.
